#### 2 BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

### **Basis of preparation**

The interim condensed consolidated financial statements of the Bank and its subsidiary (together referred to as the "Group") for the six months ended 30 June 2013 have been prepared in accordance with the guidance given by the International Accounting Standard 34 - "Interim Financial Reporting". The interim condensed consolidated financial statements do not contain all information and disclosures required in the annual consolidated financial statements, and should be read in conjunction with the Group's annual consolidated financial statements as at 31 December 2012. In addition, results for the six month period ended 30 June 2013 are not necessarily indicative of the results that may be expected for the financial year ending 31 December 2013.

The preparation of the interim condensed consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. The actual results may differ from these estimates.

The significant judgments made by the management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2012.

The Group's financial risk management objectives are consistent with those disclosed in the consolidated financial statements for the year ended 31 December 2012.

The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2012, except for the new standards and amendments listed below, which were prepared in accordance with the Financial Accounting Standards issued by the Accounting and Auditing Organisation for Islamic Financial Institutions (the "AAOIFI"), the Shari'a Rules and Principles as determined by the Shari'a Supervisory Board of the Group, related regulations of Qatar Central Bank ("QCB") and applicable provisions of the Qatar Commercial Company's Law No. 5 of 2002. For matters which are not covered by AAOIFI standards, the Group uses guidance from the relevant International Financial Reporting Standards (the "IFRSs") as issued by the International Accounting Standards Board ("IASB").

## Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For financial instruments that are recognised at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

## 4 FAIR VALUE AND CLASSIFICATION OF FINANCIAL INSTRUMENTS (CONTINUED)

# 5 IMPAIRMENT

The Group assesses at each statement of financial position date whether there is objective evidence that an asset is impaired. Objective evidence that financial assets (including equity-type investments) are impaired can include default or delinquency by a counterparty / investee, restructuring of financing assets or advance by the Group on terms that the Group would not otherwise consider, indications that a counterparty or issuer will enter bankruptcy, the disappearance of an active market for a security, or other observable data relating to a group of assets such as adverse changes in the payment status of counterparty or issuers, or economic conditions that correlate with defaults. In addition, for an investment in equity-type instruments, a significant or prolonged decline in its fair value below its cost is objective evidence of impairment.

# Equity-type investments classified as fair value through equity

In the case of equity-type investments classified as fair value through equity and measured at fair value, a significant (where market value has declined by a minimum of 20%) or prolonged (where market value has declined for 9 months at least) decline in the fair value of an investment below its cost is considered in determining whether the investments are impaired. If any such evidence exists for equity-type investments classified as fair value through equity, the cumulative loss previously recognised in the consolidated statement of changes in shareholders' equity is removed from equity and recognised in the consolidated statement of income. Impairment losses recognised in the consolidated statement of income on equity-type investments are subsequently reversed through equity. The Group has provided QR 2.6 million (30 June 2012: 11.6 million) as impairment on investment securities which were recognised under "Net impairment loss on investment securities" in the consolidated statement of income.

## 5 IMPAIRMENT (CONTINUED)

Financial assets carried at amortised cost (including investment in Sukuk instruments classified as amortised cost).

For financial assets carried at amortised cost, impairment is measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective profit rate. Losses are recognised in consolidated statement of income and reflected in an allowance account. When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through the consolidated statement of income, to the extent of previously recognised impairment losses. The Group considers evidence of impairment for financial assets carried at amortised cost at both a specific asset and collective level. All individually significant financial assets are assessed for specific impairment. Financial assets that are not individually significant are collectively assessed for impairment by grouping assets together with similar risk characteristics. The Group has provided QR 6.7 million (30 June 2012: QR 10.1 million) as impairment on financing assets which was recognised under "Net impairment loss on financing assets" in the consolidated statement of income.

#### Investment in associates

The Group determines at each reporting date whether there is any objective evidence that the investment in associate is impaired. If this is the case, the Group calculates the amount of impairment as being the difference between the fair value of the associate and the carrying value and recognises the amount in the consolidated statement of income. The Group has provided QR 47.3 million (30 June 2012: QR 20 million) as foreign exchange loss on investment in associate which was recognised under "Foreign exchange loss on translation of investment in associate" in the consolidated statement of income.
